Pop
Acoustic Wall Tile

Pop

Fresh. Modern. Tactile.

Articulate your design vision. Create a unique, contemporary wall covering. And make your workplace interiors more enjoyable by reducing noise.

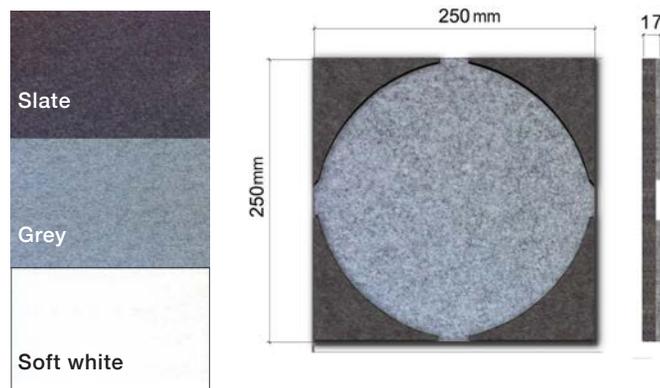

Made from layers of naturally sound absorbing 100% wool felt and part recycled polyester fibres, Pop wall tiles bring a tactile warmth and modern simplicity to office interiors.

Whether you're looking to soften the acoustics in a meeting room, make a bold impression in a reception, or break up wall areas and reduce noise in an open plan space, Pop offers a rich, vibrant and practical solution.

Specification

- Base panel made from 100% polyester fibre containing a minimum of 60% previously recycled fibres (from PET bottle-flake)
- Base panel acoustic NRC rating .20
- Top layer of 5mm thick, kiss cut 100% wool felt
- Panel weight 190g
- Base panel fire rating ISO 9705: 1993
- Felt passes fire tests BS 5867: Part 2: 2008 and Crib 5
- Installed with adhesive to suit wall finish

Colour options

Choose either slate, grey or soft white for the tile base.

Product features

- Lightweight, modular product for small or large spaces
- Absorbs sound for increased comfort
- Quick and easy installation
- Natural, and recycled sustainable materials
- Self-extinguishing and inherently flame retardant fibres
- Unique, contemporary design

Maintenance

Panels should be lightly vacuumed and spot cleaned with warm soapy water without soaking.

The top, felt design layer is available in twelve colours.
