

MEET

Making the availability of meeting rooms visible

GoBright Meet – Room booking system

Searching for a room, unnecessary empty rooms, interruptions during a meeting and dual bookings often occur in everyday practice. GoBright Room Booking effectively helps you to solve these challenges and ensures optimal use of all your meeting rooms.

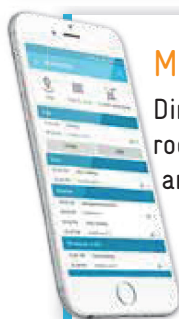

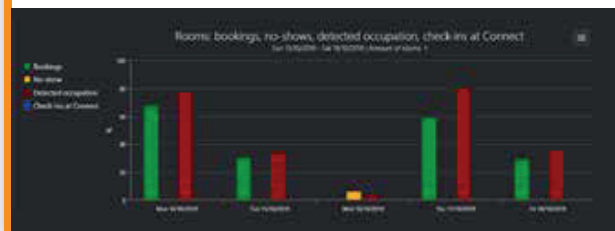

Our unique features

Outlook plugin

Searching and booking rooms, arranging catering & services and send visitor pre-registration via the easy-to-use GoBright Outlook plugin

Analysis data (e.g. occupation, no-shows)

Mobile application

Directly book a meeting room/huddle space anytime and anywhere.

Various integrations

Exchange, Outlook, Office 365, Google, Active Directory and FMIS-systems integration possible.

Full cloud solution

One platform for all GoBright solutions. On-premise installation also available.

Expand your room booking solution with these powerful additions

Control

View the remaining time of the meeting and control the presentation display

Time flies, even during meetings. Suddenly the next users are in the meeting room to start using it. Recognisable? GoBright Control shows at a glance how long the meeting room has been booked for you, so that you can finish the meeting on time or extend your reservation. GoBright Control also gives you the opportunity to control some basic functions of the room's presentation display.

Wayfinding

Show visitors and staff the shortest way to the meeting rooms

GoBright Wayfinding shows the actual occupation of all rooms in one overview. It also visualises in which direction the meeting rooms are located and which upcoming meetings are planned. So customers, guests and, visitors quickly find their way throughout the building.

Detection

Use detection for more reliable analysis data to realise most efficient use of all rooms

With GoBright Room Detection a smart sensor detects movements. When someone uses a room without having it booked, the occupancy will be nevertheless measured. This also happens if someone leaves the room without checking out. This is making the registration more accurate and the analysis data more reliable. So facility management is able to make the right interpretations of the use of assets.

Catering & Services

Book catering and other services within the same platform

With GoBright Catering & Services it is possible to book all peripheral needs before, during and after the meeting within the same platform as Room Booking. So, you no longer have to work with different software systems. For example, if the time or date of a meeting changes, the catering & services order will also change automatically.

This prevents making mistakes.

GoBright Meet – Room booking

Key Benefits:

- Effectively manage shared meeting space
- Enhances visibility of available meeting space at a glance
- Highlights features of each meeting space such as AV, Conferencing equipment & room capacity
- Eliminates double booking of shared meeting space & meeting interruptions
