Collection 2023

Parla Collection

We are a third generation furniture company that is continuing a legacy, that goes 113 years back.

We know why we shine bright;

We are talented.

We love craft.

We are tech oriented.

We work hard.

We move fast.

We are agile.

We are fully collaborative.

We thrive on problem solving.

We are a dedicated project partner.

We achieve the dreams of our project partners and we shine brighter together!

Hakan Öztunçman
Owner Director

Burak Öztunçman
Owner Director

A message from the Light Bearers of Parla

At Parla we are dedicated to chasing the light.

The blessed light of our grandfather who started this business as a loyal and respected furniture maker of The Ottoman Imperial Family.

The guiding light of our father, who taught us that we must take care of our customers and employees equally.

The sparkling light of our talented designers and hard-working factory workers.
The light that we see in the faces of our delighted customers.

At Parla what uplifts our day is not just creating beautiful pieces of furniture but creating exceptional, outstanding outcomes and constantly raising the bar when it comes to quality and care.

This vision has made Parla shine bright as a reliable, resilient, and globally respected company that designs, crafts and manufactures pieces that stand the test of time.

Every day, we are ready than ever, to shine brighter.

We are here to pour in light to your projects, and shine together with you.

Fusing Heritage, Crafts & Technology

Within our **15.000 sqm production facilities** consisting of workshops for wood, stainless steel and upholstery; we design and manufacture furniture using **hi-tech Italian machinery** alongside **experienced hand craftsman** who guide the process, and keep the heritage crafts element going.

Our **in house team of industrial designers & craftsmen** conceptualise, develop, design, and experiment with new ideas.

This brings about perfectly formed pieces of furniture that are fresh, cutting edge, technologically advanced and reflect Parla's heritage of traditional crafts in a contemporary manner.

We also welcome well known architects and designers to join us in creating new pieces, and run **'Product Creation Workshops'**.

In these workshops we marry the designer's expertise & innate talent with Parla's traditional & modern craft techniques, cutting edge technology and belief in **pushing boundaries**.

A Sustainable Future

We really do care...

About society, about the environment, about the economy.

We care about how we impact the environment. Nature is our mother!
We care about looking after her, and leaving the right kind of legacy for future generations.

We manufacture with sustainability in mind, constantly developing ways to be more in harmony with nature when using resources such as wood, steel, aluminium, textiles and plastics.

We care about people; we care about women, we care about young people. And, like many companies in this sector it is 'work in progress'; everyday we are realising more about what we can do and how we can implement changes.

Using the UN Sustainable Development Goals list as a yardstick, we have set up an internal team that prods, probes and pushes the whole company to do better. Of course not all 17 of the goals are related to our business, but the

Goals that we feel we are really working on are:

#3 Good Health and Well-Being

#4 Quality Education

#5 Gender Equality

#6 Clean Water and Sanitation

#7 Affordable and Clean Energy

#8 Decent Work & Economic Growth

#9 Industry, Innovation & Infrastructure

#10 Reduced Inequalities

#12 Responsible Consumption and Production

#13 Climate Action

#15 Life on Land

#17 Partnership for the Goals

Embedding these bigger picture Goals into our company culture is a journey in which we find ourselves inspired to then tackle specific areas on a micro level.

Our Practical Development Goals

By the end of 2023

- All adhesives and varnishes used will be water based.
- All our plastic packaging will be bio-degradable.
- 70% of our standard fabric options are manufactured in an environmentally conscious manner with Oeko-Tex, Greenguard and/or EU Eco Label certificates.
- 50% of our standard outdoor fabrics are recycled.

By 2025

- 80% of the products in our collection will use recycled fabrics.
- At least 20% of our Collection's product families will be crafted from sustainable, recycled and/or bio compostible materials.

By 2027

- We will have put a water recycling system in place for the whole factory and all drinking water will be supplied from these units.
- Our factory will reduce its water consumption by 80%.

By 2030

- 50% of our Collection's product families will be crafted from sustainable, recycled and/or bio compostible materials.
- Our production facilities will be using a renewable energy source.

Find out more about our sustainability goals at parladesign.com/sustainability

Our Design Ethos

FUSION

In each of our designs we fuse influences from our rich cultural heritage and the artisanal. We apply this to design; to form, to technique and to use of materials.

HARMONY

Every piece of furniture we design, craft and manufacture is a true reflection of our client's vision and sits in harmony with the environment it is being placed in.

RESPECT TO RESOURCES

In both design and manufacturing we set limits to how we apply our vast pool of resources and knowledge so that we are not exorbitant with the use of time, materials and labour.

Designers

Betül İnci

Head of Parla Design Team, Betül started exploring ways of expression at a young age. Alongside her ultimate role model, her father, who was a teacher, sketching, designing and producing craft during her childhood years led to her building a professional career as a designer. She studied Industrial Product Design at Istanbul Technical University and Linneaus University in Sweden; following on from that she also added furniture design training at The Florence Institute of Design to her education.

From the Aegean region in Western Turkey to metropolitan Istanbul, Scandinavia to Mediterranean Italy, her multicultural education is very much reflected in her designs. She likes to use forms born from minimalism, add to that the inclusion of bold colours, she combines simplicity with extravagance in a poetic manner.

Betül has been working for Parla for 10 years and during this time she has participated in many projects spanning from New York to Dubai as Product Designer and Project Manager.

Betül's design Nigiri Chair has won the Good Design Award 2021 from The Chicago Athenaeum: Museum of Architecture and Design.

Aysel İlişik

Former Project Manager and Senior Designer of Parla, Aysel studied Industrial Design at Anadolu University and started her career as a product designer in Istanbul.

As a highly experienced furniture designer and business development enthusiast; Aysel is focused on building and maintaining Parla's exceptional customer relationships within the A&D community.

Specialized in Hospitality interiors with a deep understanding of high-end and bespoke furniture; she is currently working as the Head of Designer Relations.

Deniz Albayrak

Born in Bulgaria, Deniz studied Industrial Design at Anadolu University and moved to Istanbul after his graduation.

Starting his career as a product designer in Parla, he is currently one of the co-founders of Parla Studio, while continuing his development in management roles in the company.

His Professional development has taken him from being a Project Manager to a Pre-Contract Manager to currently working for Parla as a Senior Projects Manager, living and working from Parla's London Office.

Erden Dereli

After graduating from Anadolu University; Erden completed his design internship at d'Arc Studio Roma. Moving forward to his professional career in Parla; he worked 4 years as an Industrial Designer and 3 years as a Production Planning Manager, where he experienced various projects of mid to large scale all over the world for contract products.

Being one of the founders of Parla Studio, Erden currently continues his works specialising on production processes. His designs are mainly focused on materials, functionalities, manufacturability and R&D industry.

Berrak İlkcan Şener

Born in Fethiye, studied in Eskisehir and based as a designer in Istanbul, Berrak was awarded by BigSee for her design of the Rimo Armchair in 2022. Berrak completed her Bachelor's degree in Industrial Design at Anadolu University. During her education, she participated in a student exchange program at HAWK Hochschule University, Hildesheim, Germany.

Moving forward she based her designs on these influences, combining them with her unique ideas. Aiming for timeless, clean and functional product designs.

Berrak creates durable and user friendly products which are also timeless in their look.

Seda Yetkiner

Seda studied Industrial Design at Anadolu University and made a quick start to her career at the same time at Yakamoz Glass designing niche objects and installations. During her years there, she found the opportunity to practise and become a master at hot glass production, which then became her passion – creating glass objects is now her most favoured hobby. She joined Parla Design Studio in 2019, widening her experience with new materials.

Her approach to design is reflected in furniture through bold shapes, that are warm, familiar, grounded and functional whilst embellished with elegant details.

Enis Altinkaynak

Enis was always fond of exploring his imagination via his drawings.

After graduating from Anadolu University, he proceeded on to a master's degree at Marmara University where he continues his research on the effects of modern technologies within the area of product design, while lecturing upcoming Industrial Designers at Beykent University. While enjoying every design ideology, Enis actually prefers to follow a totalitarian approach when it comes to design.

Always trying to reach excellence, he is fond of learning about materials and production processes in order to master them.

Yasemin Derici Çeri

During her studies of Industrial Design in Izmir; she and 4 of her friends set up a brand that created handmade concrete trays & objects. Following their passion for design and identity, they took part in the Milan Design Market, as part of Milan Design Week, and launched their product line there.

Focusing on product design, photoshoot styling, trend research, social media managing, visual, creative, and digital media creation for marketing, Yasemin continues her career as an Art Director.

Burcu Özdamar

After graduating from Middle East Technical University, Department of Industrial Design, she started working at Parla.

Working in cooperation with experienced craftsmen in the workshop, she learned the nature of the materials closely. The combination of different textures, geometric games and East-West identity synthesis can be easily experienced in her products. The designer, who cares about understanding the needs of both the user and space, stands out with her customizable products.

Burcu is currently working as a product manager and continues her design projects personally.

Umut Kargınoğlu

Born in Gaziantep, Umut studied Industrial Product Design at Istanbul Technical University and settled in Istanbul to base his design career in the city. During his internships, he gained experience on ideation and production methods for office, restaurant and urban furniture design.

Highly skilled in Product Design, Model Making, Branding & Identity, Concept Generation accompanied with a strong engineering experience for professional production techniques, Umut is currently working as a Product Design and Development Specialist.

Buket Hoşcan Bazman

Buket Hoşcan Bazman was born in Izmir, Turkey, in 1989. Graduated from the Işık University and after few years of working in the industry, she founded her own design brand under the name “Marbleous” in 2015, which produces marble detailed furniture and objects. In 2018, Buket set up her own design studio.

Currently, she is working on contemporary collectible pieces.

Buket focuses on traditional craftsmanship with natural materials. Each piece is made by craftsmen based in Turkey.

David Fox

David Fox Design, is a multi-award winning industrial and product design studio with awards from Red Dot, Good Design Award to FX product designer of the Year in 2009.

Their spectrum of product designs range from furniture, to bathroom basins, faucets, cabinet hardware, fabric and carpet design.

Their international client base covers: Belgium, Turkey, UK, Italy, Czech republic, Canada, Poland & Spain.

Esin Sözer Kalender

Arketipo Design was founded by Murad Denizaltı , Müge Hansoy Kınacı and Esin Sözer Kalender in 1994. For the past 27 years, they have worked on various Hotel, Spa, Shopping Center, Office and Residential projects; achieving successful results in each.

They have achieved over 80 projects in their country of headquarters, Turkey and have also achieved 100 completed projects in various countries such as Dubai, Germany, Russia, Libya, Kazakhstan and Ukraine.

Klan Studio

Founded by Eşref Akın Oral and Işık Görgün Oral, Klan Studio is a design studio working primarily on furniture, yacht and machinery design sectors.

They like to define themselves as “modernists” prioritizing the efficiency of casuality and dominance of clever design.

What they want to underline, is always superiority of consistency. Naturally, making sure they always deliver the “right design” for every brief they come across.

Kilit Taşı Design Studio

Kilit Tasi is a design studio based in Istanbul which provides industrial design, design management, strategic design consultancy services to companies from different sectors. Co-founder Kunter Sekercioglu values cultural traits, craftsmanship, history and the details of daily life as points of inspiration for his designs.

He believes that quality in design is defined by distinction, innovation, enjoyment, practicality and affordability. In order to achieve this, he chooses to participate actively in every stage of the process, starting from the initial sketches all the way to the launch of the production.

Materials & Colours

Solid Wood

Ash

Beech

Wood Veneer

Oak

American Walnut

*We use quarter cut veneer sheets with slip matching on plywood as our standard for wood veneer options.

Metal

Brass

Powder Coated Matte

Coloured Steel

* This finish requires an additional 2 weeks for production.

Glass & Stone

Outdoor

Iroko

Natural*

* Direct exposure to sunlight will eventually affect Iroko's colour, creating a darker shade in time.

Guide for Care & Maintenance

Thank you for choosing Parla.

Our mission is to manufacture products that meet the highest standards in design, quality and functionality.

Regular professional care extends the life time of each product and thus also your satisfaction with its use. You can find some useful information on how to use and carefully maintain our products below.

SOLID WOOD INDOOR USE

The Solid wood we use is an actual living part of the tree it comes from, and is composed of wood fibers that are held together with adhesives.

At Parla, our most popular choice of solid wood is Beech, and what we do is create pieces of lumber that have their own characteristics; unique in grain pattern, colour, and texture. As a result each piece of solid wood displays different behaviour and form when different carving techniques are used. Unlike wood veneer, solid wood pieces are frequently used for curved and multi-dimensional pieces.

ASH

With a neutral colorbase, ash trees are very durable and robust. Ash also has better resistance to sunlight and its possible corruptive effects.

BEECH

Having a light-pink undertone, beech wood is very easy to form, therefore easy to use for curved shapes and round corners requiring further surface processing. Parla Collection products are generally produced using Beech wood.

RECOMMENDATIONS

We recommend cleaning the surface regularly with a slightly damp soft cloth. Do not use heavy chemicals for cleaning purposes and protect the surface from sharp objects to avoid scratching.

*As wood is a living material, variations in colour, pattern, and pigmentation will occur on each piece.

*Wooden furniture will also change appearance over time as it is affected by

the environment (daylight, humidity, etc.) in which it is placed.

*Solid wood furniture should not be placed too close to heat sources nor should it be in frequent contact with liquids.

*Do not use abrasive materials.

WOOD VENEER INDOOR USE

A veneer refers to a thin layer of wood peeled or cut from a section of a tree. It is then bonded onto a thick piece of wood, typically MDF, chipboard, or plywood. These layers are classified later according to their cutting technique and final patterns. At Parla, we use quarter cut veneer sheets with slip matching on plywood as standard. Each veneer table layer is unique. No matter how expertly cut or treated, none of its layers are identical to another, which is the charm of using natural materials. Veneer provides high-quality looks without the need for large amounts of wood consumption.

OAK

A somewhat brittle material when processed, oak is very resistant to heavy weather conditions and harsh climates as a tree. Being a durable and robust form, oak pieces require expertise and unique production techniques.

WALNUT

A tree familiar with mild climates, the walnut tree has high fibers resulting in splendid and rich patterns on its layers. Easy to process, walnut has high aesthetic qualities however it requires suitable methods to bring out its beauty and strength.

RECOMMENDATIONS

We recommend cleaning the surface

regularly with a slightly damp soft cloth. Please wipe the veneer following the direction of the wood grain. Compared to solid wood, wood veneer is less resistant to heat and moisture, especially around the edges where layers of wood are visibly pressed. Extreme heat and any contact to water must be avoided, especially around the edges.

*Veneers generally have color differences compared to their matching solid wood stain options. Which are usually used for chair legs or supportive elements. We, therefore, especially recommend using wood veneer material for stained table tops and legs.

*Do not use oil or ammonia-based products to clean wood veneer.

*Do not use abrasive materials.

METAL INDOOR USE

Metal, brass, aluminium, and stainless steel are the most preferred materials at Parla for the metal components of furniture we produce. Depending on the product type and place of use, metal surfaces are available in Powder Coated Textured (outdoor) or Matte (indoor) or PVD Coated; Polished or Brushed (indoor) finishes.

STAINLESS STEEL

Durable and more accessible, stainless steel is perfect for structural elements and metallic finishes. PVD coating can be used with different finishes, as shown in our coloured steel options.

METAL & ALUMINIUM

Parla recommends Powder Coated metal in matte finish for indoor use and aluminium or treated metal in textured finish for outdoor use. Aluminium is a rust-resistant and light material that can be used directly with powder coating without further treatments. However, we recommend using powder coated aluminium with a textured finish to increase the hold of coatings that protect the metal from heavy conditions of outdoor use. Metal materials on the other hand need to be pre-coated with cataphoresis treatment before coating for protection over rust and corrosion.

RECOMMENDATIONS

We recommend cleaning the surface with a damp cloth and wiping the surface immediately after.

- *Do not use alcohol.
- *Avoid using abrasive materials that can alter or scratch the surface.
- *For PVD coatings, Parla uses an environmentally friendly Anti Fingerprint solution. Creating a protective layer over stainless steel, this solution creates an easy-to-clean surface, reducing fingerprints.
- *it is not recommended to use PVD Coated steel under direct sunlight for extended periods since it can affect the coating colour over time.

GLASS & STONE

GLASS

Characteristic results of glass manufacturing such as tiny air bubbles, thickness variations and light pitting, should always be expected with glass. All glass used in our furniture is tempered to ensure excellent durability. For painted glass, all RAL colour options are available and the final finish is tempered extra clear glass with colour.

MARBLE & STONE

Travertine Stone and marble are natural and porous materials of sedimentary origin. They are usually collected as stone blocks which are later cut into layers of

stone using a delicate process. The texture of these stones depends on grains. The formed and pressured element groups to create mesmerising grains and layers makes each piece unique. The density of these element groups determines the colour and patterns of the stone.

Before using them as furniture parts stones are treated with an invisible solvent-based chemical to sustain their surface integrity. It penetrates stone pores and protects their surface against dirt, dust, water or stains, generating an easy clean effect. Due to its porous nature this treatment must be applied every few months to help the surface reach its entire service life.

RECOMMENDATIONS

We recommend carefully cleaning the surface with a barely damp soft cloth to avoid scratching the surface.

Marble is porous and has a poor resistance to acidic substances (vinegar, lemon juice, wine, tea, coffee, etc.) that even in small quantities can corrode the surface and penetrate into the pores forming mat spots.

- *Do not use any products containing acetone ammonia, chlorine, solvents, abrasive products and furniture polish, since these might permanently damage the surface of the product making it look opaque with marks.

Glass is not scratch-resistant so avoid dragging objects across the surface. Glass is very resistant to heat sources. Still we recommend never placing hot objects directly on the surface since high temperature differences create fragile spots on the surface which, could result in cracks.

- *Glass surfaces should be wiped with a clean dry cloth. Cleaning can be done with household ammonia or unique glass cleaning products if the occasion requires it.
- *Never use abrasives or sharp -edged tools to prevent scratching.

OUTDOOR

Outdoor furniture needs resistance to heavy weather conditions and direct sunlight. Our experience over time recommends specific types of materials for outdoor furniture, such as Iroko wood, woven ropes, and powder coated textured metal structures.

SOLID WOOD

OUTDOOR USE - IROKO

Iroko is a particular type of timber that grows in rainforest weather conditions, making it highly durable for outdoor use. With its high density of fibers, Iroko can extract minerals and particles from the soil. Because of these features, Iroko grows much faster than traditional timber types and can be produced in a fast-paced sustainable cycle. Iroko also showcases its stain colors distinctively due to its unique, light yellow based color.

METAL & ALUMINIUM

OUTDOOR USE

Since it is rust-proof, we use powder coated aluminium or pre-treated and powder coated metal structures for outdoor furniture. For outdoor use, we recommend powder coated metals with a textured finish, pre-coated with cataphoresis treatment to increase the paint's grip and protect the metal from heavy conditions of outdoor use. For aluminium, powder coating can be applied directly.

ROPES

The weaving technique and rope options create a vast playground for furniture designers. With round and flat options, hand woven ropes are carefully placed according to templates by professionals constructed by very skilled craftsmen. Woven from pre-UV treated strands, outdoor ropes also have a multi-layered internal structure, making them highly resistant to tension, colour fade and heavy weather conditions.

RECOMMENDATIONS

We recommend cleaning the Iroko surface regularly with a slightly damp soft cloth. *Do not use heavy chemicals for cleaning purposes and protect the surface from sharp objects to avoid scratching. *Although they can be in touch with it, outdoor furniture mustn't be in direct contact with salt water for long periods of time since it can cause corrosion. Also, direct exposure to sunlight for extended periods will eventually affect Iroko's colour. *Do not use any chemicals for cleaning powder coated metal, clean with damp cloths or water. *For extreme weather conditions, UV treatment types for outdoor ropes may vary. Please specify area of use to select the suitable treatment type.

UPHOLSTERY

GENUINE LEATHER

Natural leather has a pleasant characteristic smell and is wear resistant. Its quality depends on the animal's lifestyle as well as on the method of leather processing. Minor defects originating during the animal's life, such as wrinkles, blood veins, scars, scratches, etc. are regarded as permissible and are even required as evidence of the 'genuine and unique' quality of the leather.

RECOMMENDATIONS

The best maintenance for leather is regular vacuuming with a soft brush. Avoid using cleaning products and sharp objects. If cleaning is necessary use boiled water with natural soap shavings of good quality. Whip 2-3 tablespoons of soap flakes in 1-liter water and only use the foam. Apply the foam with a soft cloth, let the furniture dry and dry afterward the leather off thoroughly with a soft cotton cloth.

ARTIFICIAL LEATHER

Artificial leather is usually undemanding in maintenance.

RECOMMENDATIONS

Remove dust regularly with a fine suction force of your vacuum cleaner or with a wet cotton cloth.

- *Dry spilled liquids immediately by a dry cotton or paper towel.
- *Do not let other stains dry on the surface but remove them immediately with lukewarm water.
- *Wipe the surface carefully with a moistened cotton cloth and dry with a dry towel.

FABRIC

Cleaning and maintaining upholstered furniture regularly is important to retain the appearance of the fabric and to prolong its lifespan. Over time, dust and dirt can cause furnishing fabrics to change color and exacerbate wear.

RECOMMENDATIONS

Vacuum the furniture regularly using the upholstery nozzle to remove dust and avoid fluff and pilling. Straighten the fabric with your hands from time to time. Wrinkles in the fabric can be straightened using a steamer. Soak up spilled liquids immediately with an absorbent napkin or cloth by dabbing gently towards the centre of the stain. *Never use concentrated detergents or bleach, ammonia, optical brighteners or soap intended for hard surfaces. *We do not recommend spot cleaning of individual marks and stains as this damages the fabric and causes colour loss. *Avoid rubbing the material hard as this could result in loss of colour and damage the fabric.

We kindly ask you to follow instructions and recommendations contained in this manual.

Regular professional care extends the life of your product and besides can be also a condition for warranty compensations. The manufacturer does not take any responsibility for potential damage to the product resulting from unauthorised use and unprofessional handling of the furniture.

Parla is constantly working on further development of all products, which may cause some changes in used materials, constructions and finishing. As a result of this the recommendations and guidelines for the proper use of products may be also changed. Thank you for your understanding and we wish you pleasant moments spent while using our products.

**The products displayed in this catalogue are to be considered as sample configurations. The textures, colors of materials, and finishes are indicative due to variations that may result from the printing process.*
