Introducing Pren, a collection of freestanding lockers, wardrobes, and cupboards that make specifying your entire storage system refreshingly simple.

Pren, which is the Welsh word for wood, tells the story of how proud we are of our heritage and of our independence, having been based in South Wales since 1988.

With purpose beyond storage, Pren's freestanding units act as zone dividers throughout the office, creating defined neighbourhoods wherever you need. Contra-facing units are available at multiple heights, maximising storage throughout, and additional including planter tops and sleek over-sailing panels add mood-boosting biophilia, or create an extended standing height work bench

Spanning warm wood-effect tones and solid colour finishes, Pren is available in a variety of laminates, matching LockerWall's broad palette, creating symmetry for your storage. And almost entirely made in-house, the lead times remain significantly shorter than average.

Pren's storage is designed to be entirely secure with a range of locking options. From smart, contactless RFID locking solutions, to the classic key or combination locks, you can relax and continue with your day, knowing your belongings are safely stored.

Over 80 years of
award-winning
design expertise

Europe's leading
manufacturer of steel
storage with a state-
of-the-art wood plant

15,000 products leave
our South Wales
factory every week

Manufacturing excellence that's engineered around you.

We're proud to be a full manufacturer that really is Made in Britain - we manufacture all our own steel and wooden furniture in our South Wales factory and export worldwide.

We practice Lean Manufacturing, and have recently invested over £2m in machinery to ensure we are using the latest manufacturing processes and technologies, continually seeking to improve our products and designs.

Our knowledge and expertise is unrivalled and continues to grow. Our team is here to guide you through all the options - from dimensions and finishes, to putting together a precise design specification. Whatever the project requirement, we're on hand to ensure you achieve exactly what you want.

We create furniture that lasts a lifetime for our customers; made from the highest quality materials, using the latest innovative technologies and processes with minimum impact on our environment.

Workspace essentials

A perfect combination

Inspired by and designed to suite with our premium LockerWall range, Pren allows you to build upon your existing LockerWall installation, or complement it, without excess alterations and additional finishing panels.

You can even design your office space combining both Pren and LockerWall from the outset. Entirely freestanding, with a breadth of options, finishing touches and lock choices, Pren becomes an extension of LockerWall, integrating it throughout the office as space division, isolated storage zones and additional standing height work surfaces.

Both ranges share a laminate colour palette, with a choice of wood effect and neutral solid colours to bring warmth to your space. The palette has been designed to not only work seamlessly across Pren and LockerWall, but also offers contrasting finishes that work well together.

Pren works perfectly with LockerWall to maximise your space and storage requirements.

Purpose beyond storage

Create zones and wayfinding throughout your office with Pren. The contra-facing design allows for dual-sided access, maximising usable storage space, while oversailing decorative tops keep joint lines to a minimum.

The lower height units are perfect for space division and give open-plan workplaces defined neighbourhoods. Separate focussed working zones from collaborative or break-out areas with Pren's additional fixtures – wooden planters which incorporate mood boosting biophilia, and sleek tops that double up as standing height worktops.

Wherever placed in the office, Pren fulfils your storage requirements while shaping dedicated working zones, maximising productivity within your workspace.

A systems approach to storage

Pren makes specifying an entire floorplate surprisingly simple. The extensive range covers all aspects of workplace storage; from personal storage lockers and drawers, cupboards for filing and technology, or a place to hang your coat.

Your storage can support multiple possibilities in the workplace - the various height options are perfectly suited to form subtle space division in open plan environments.

Blending desirable workplace aesthetics with practical storage, Pren's clean design means there is no need to specify extra finishing panels; you can achieve an entire, uncomplicated, storage system, without compromising on cost.

All Pren units are 500mm deep, meaning any combination can be placed side-by-side or contra-facing. And with a variety of locking options available, your workforce can rest assured that their personal belongings are safely stowed throughout the working day.

Storage meets style

Perfect your boardroom or meeting room with a contemporary credenza to create a focal point, with a place to store technology or guests' belongings.

Pair lower height cupboards and lockers and opt for an oversailing top to create a luxurious addition to a meeting space. Pren cupboards feature round, solid wood handles for a smart, subtle design.

The palette of soft wood effect textures and modern neutrals available for Pren complement any colour scheme, and will blend beautifully with your brand colours, whether you are designing a new space or simply upgrading your storage.

Extra information

- The entire Pren range shares the same 500mm depth, so lockers, wardrobes and cupboards can be neatly combined.
- Each unit includes full height finishing panels and a plinth meaning there's no need to specify additional materials. This also means that reconfiguration is easy should you choose to refresh your workspace, providing excellent value and longevity.
- Internal accessories, such as shelves with under shelf filing* and coat rails are included. [Additional accessories](#) are available to order separately if you require them.
- Manufactured almost entirely at our factory in South Wales, keeping lead times to a minimum.
- The Pren range has a five-year guarantee.

*available in cupbaord units.

Locking technology

AB Lock

AB locks are a great, cost-effective option if you are looking for a straightforward, secure solution with user keys, ideal for both assigned and shared lockers.

Combination locks

Combination locks seamlessly integrate with many of our products while providing enhanced security and protection. With both shared and assigned user options, combination locks are a reliable, cost-effective solution for personal storage.

LEHMANN

LEHMANN

Digilock

RFID locks

As personal storage solutions advance, the security element is following suit, and touch free, RFID locks are becoming increasingly popular for workspace installs as well as leisure and hospitality environments. Trading in lock and key entry for hassle free RFID access brings control and peace of mind to flexible workforces.

Digilock

We design and manufacture the highest quality storage solutions, but we also have the knowledge and expertise on hand to advise you on the best lock choice.

Our standard range of secure locking options for Pren gives all employees – whether permanent, mobile, or nomadic – a sense of peace of mind while in the office.

Whether you opt for a traditional key lock or a more advanced mechanical lock that can be programmed depending on the user, we work with a variety of the most trusted lock providers to meet even the most challenging privacy and security requirements of the modern workplace.

Specifying Pren alongside a LockerWall installation?

Rest assured your lock choice can be integrated across both products, meaning your entire storage solution can operate under one secure locking solution.

Finishes

Pren gives you the scope to create an efficient, multipurpose storage system for your entire workspace. It can be specified in a variety of beautiful laminate finishes to bring warmth and softness to your office, and match seamlessly with your LockerWall installation and brand aesthetic.

Our commitments

100%
of wood materials used in manufacturing is FSC and
PEFC compliant from sustainably managed sources.

As a proud British manufacturer, we take our responsibilities towards the environment very seriously, ensuring that sustainability runs through everything we do. Our dedicated sustainability team ensures that our facilities are as environmental as possible, while ensuring our products last and are sustainably sourced.

Bisley products are designed for functionality, durability, and a long service life. They are all tested rigorously to British and European harmonised standards for safety, strength and stability.

As for electricity, we source all of the electricity that powers our manufacturing activities through renewable energy tariff. We also participate in the Energy Savings Opportunity Scheme (ESOS), which has led to substantial investment in procurement and installation of energy efficient machinery and equipment.
