Workspace Wellbeing

Who we are

We're JDD, a UK-based commercial furniture manufacturer with a friendly and honest approach to business and design. Founded by two best friends in 2010, we design and build imaginative, practical furniture that enhances workspaces. From imagination to installation, everything is handled in-house, ensuring projects run smoothly and our clients feel supported every step of the way. Our skilled team of makers, upholsterers, and designers craft meeting pods, soft seating, and bespoke solutions that bring people together.

Imagination to installation

We handle everything from product design, development, testing, manufacturing, delivery, installation and aftercare in-house.

Tabatha

is a standalone table with standard and bespoke sizes, as well as 100s of standard, premium, and recycled tabletop options.

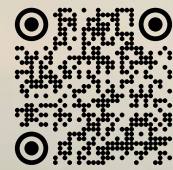

Archie

is the first arched pod, designed and built here at our West Midlands HQ.

Inspired by our popular Bob, Bea and Bill meeting pods, he brings a calm, comfortable space to contrast the busy open-plan and co-working office. Somewhere to focus, meet, or simply take a breather.

Any of our banquette seating options and tables are available to furnish the inside.

Charlotte

is the next phase of our wellbeing offering. We have designed Charlotte to be an ergonomic, comfy, and stylish chaise that provides employees with a space to relax and disconnect from their busy environments.

In addition, integrated acoustic technology (patented) can be built into Charlotte. Based on low frequency vibrations transmitted to the user, which directly affect the autonomic nervous system, Charlotte calms the body and mind automatically, without concentration, practice, or conscious effort.

NEURÔSONIC

Fearne

planters help bring the outside in, proven to improve physical and mental health, reduce stress, and boost productivity.

By incorporating nature into built environments, Fearne can be used to zone joint or personal spaces, promoting collaboration or contemplation.

This year sees Fearne upgrade with the optional extra of a smart grow lighting technology that makes cultivation easy.

No windows, green thumbs, or guesswork required.

Luna

Luna represents our evolution of the JDD design language, introducing softer forms and sweeping lines.

Available in one, two, and three seat options.

Reece

is a statement of intent. An entirely bespoke reception collection born from a one-off showroom design and elevated through craftsmanship, curiosity, and your demand for something better.

Reece isn't just a product. It's a fully modular design experience, crafted to bring your ideal reception space to life. You can now apply the design to anything from conference tables to coffee tables.

Emme

is a curvaceous modular sofa that is perfect for reception and breakout areas. Convex, concave, and straight sections enable you to build endless configurations.

Louie

is a laptop table that's beauty lies in its simplicity. A 2-piece construction that adds functionality to a seating area. The angles slide under furniture or wrap around the corner for maximum comfort.

Nita

is our sustainable single-seat and pod made from SEAQUAL fabrics, which are produced using reclaimed ocean plastic. Available with or without the seat and the optional halo light.

Bob Rooms

is a fully configurable full-size meeting room that eliminates the need for permanent walls or structures. Add windows to any panel.

Terry

is a modular bubble banquette seat with endless configurations utilising straight, convex and concave sections. Tear drop tables are also available.
